Senate Military Committee Has Already Reported Adversely Upon the Nelson Proposition.

Apparently the proposition for creating a volunteer retired list for surviving officers of the civil war is destined to be shelved for this session of Congress. It would cost the Government from \$3,-000,000 up, according to the number of grades that were included in the eligible list, to meet the payments each year.

While the proposition has not yet been taken up by the House Committee on Military Affairs, Chairman Hull has decided to have it given a full hearing within the next fortnight, and the committee is expected to make rather a complete report, discussing the proposal in all its phases. Meantime the Senate Military Committee has decided adversely to the measure for this session

What Bill Means.

The proposal, backed by the surviving civil war officers, is that everybody who attained the rank of major or brigadier general, by brevet or otherwise, for services during the civil war, shall be eligible to retirement at three-fourths pay of a captain. Now, at the close

eligible to retirement at three-fourths the pay of a captain. Now, at the close of the war about everybody of the grade of captain or higher was brevetted a brigadier, and these would therefore be entitled to the retirement pay.

One of the grounds for objection is that lieutenants would be excluded by such an act, yet below the grade of colonel the rank at the close of the war was largely a matter of chance. The lucky man whose superiors were advanced or disabled, was pushed along and secured good rank, while the less fortunate, perhaps doing just as good service, had not attained nearly so high rank when the war ended. Therefore, if the plan is ever put into effect, it will doubtless be broadened to include all commissioned officers. This would add largely to its expense, and postpone the day of its adoption.

Senator Nelson's bill provides that retirement shall not take place before the age of seventy; that no officer who served after the war in the regular army shall be eligible, and that an officer who lost an arm, leg, or both eyes shall be eligible to retirement without reference to the length of his service, while all others must have served at least two and one-half years in order to be eligible.

Next session, or at latest, next Congress, is expected to see a renewal of the effort to secure passage of the act in some form.

Public Printer Announces Appoin ment to Take Effect Monday-Permanent Selection After Reorganization.

Assistant foreman of the bindery, Blake Espey, was today appointed by the Public Printer acting foreman of the bindery, to take effect on Monday, the 16th, succeeding Foreman P. J.

Espey was warmly congratulated by his friends in the bindery, which included all the employes, on his deserved recognition by the Public Printer. A permanent foreman of the bindery will not be appointed until after Public Printer Stillings has perfected and car-ried into effect his plan of reorganizing the bindery, which is to so arrange the work that all the work of the bindery can be executed under one roof.

NEW YORK, April 14.-The frank expression of John Mitchell that he has hopes that the final reply of the operhopes that the final reply of the operators to the miners' latest proposals for arbitration is taken generally to mean that the miners' "cale committee would gladly accept even the slightest concession in order to avoid a strike.

It was said today that Mr. Mitchell's cheerful utterances could only be construed as a delicate suggestion that if the operators would concede something

Mitchell's statements, the operators still declined to change their last proposi-tion, it would be because they desired force a strike in order to smash the ion and sell the surplus tonnage of

Either attitude is fraught with untold damage to the country as a whole. The fool who has not sense to discrimi-

There is nothing more distressing to every good patriot, to every good American, than the hard, scoffing spirit which treats the allegation of dishonesty in a public man as a cause for laughter. This truth should be kept constantly in mind by every free people desiring to preserve the sanity and poise indispensable to the parament success of self-government. Yet, on the other hand, it is vital not to permit this spirit of sanity and self-command to degenerate into mere mental stagnation. Bad though a state of hysterical excitement is, and evil though the results are which come from the violent oscillations such excitement invariably produces, yet a sodden acquiescence in evil is even worse.

this moment we are passing through a period of great unrest-social, political, and industrial unrest,

If it seeks to establish a line of cleavage, not along the line which divides good men from bad, but along that other line, running at right angles thereto, which divides those who are well off, then it will be fraught with immeasurable harm to the body politic.

We can no more and no less afford to condone evil in the man of capital than evil in the man of no capital.

The wealthy man who exults because there is a failure of justice in the effort to bring some trust magnate to an account for his misdeeds is as bad as, and no worse than, the so-called labor leader who clamorously strives to excite a foul class feeling on behalf of some other labor leader who is implicated in murder. One attitude is as bad as the other, and no worse; in each case the accused is entitled to exact justice; and in neither case is there need of action by others which can be construed into an expression of sympathy for crime.

Then there are hundreds of votaries of the fickle life of the racetrack who came to town early in the month, after a winter of privation and vissicitude, to return now by the special, seated in a parlor chair.

Right after the last race the owners and trainers will start to lead out their horses and soon a besweatered army of small boys and men will be seen swarming along the railway siding drawn from the four quarters of the course. Each car is allowed one man to every two horses and no car more than four men. You can ret comfortably ten head of thoroughbred stock into the ordinary horse car. But do the owners observe these regulations or can the railroad inspectors enforce the company's edict? Every car has it's full complement of "extras" arranged for long before the hour of entertainment and then comes the accommodation of the "dead ones" who must "beat it" back to New York.

At last the tide of American invasion of the British turf is turning and now the smart brothers of the sport from across the briny are quietly coming into the metropolitan racing field. This is interesting and also formidable, for it is well known that nowhere in the world can there be found a sharper player than the English turf operator. When in America last autumn, "Danny" Maher predicted this, and even this early in the season, the prophecy is finding a fulfillment.
